

Corrections

- In this paper, we used $\gamma = 0.9$ for the calculations of \hat{p}_{cdf} .
- In this paper, we used $d = \hat{F}^{-1}(0.9)$ initially for the calculations of \hat{p}_t .

- **Table 3**

Control limits with the parameter estimates.

Method	\hat{p}_{ml}	\hat{p}_{cdf}	\hat{p}_t	\hat{p}_m	\hat{p}_h
parameter estimate	0.3085	0.4708	0.4617	0.5000	0.5000
LCL	0.0000	0.0000	0.0000	0.0000	0.0000
CL	2.2414	1.1238	1.5449	1.0000	1.0000
UCL	10.3276	5.7586	7.4933	5.2426	5.2426
